Method And System For Providing Services For Wireless Data Calls
Our File No. 067191.0116

Dear Ram:

Enclosed is a draft copy of the above-identified application for patent for your review and comments.

Please review the enclosed patent application carefully, in order to verify that it accurately and adequately describes the invention to which it is directed. As part of your review, please ensure that the application as written would enable one skilled in the art to make and use the invention without undue experimentation. In addition, please review the application for technical accuracy and ensure that the application sets forth the best mode contemplated by you for carrying out the invention.

If you determine that a change or correction may be needed please call me so that we can discuss each proposed change or correction.

We take this opportunity to remind you that patent applicants and their attorneys are required to disclose to the PTO any information known to them which is "material" to the examination of the patent application. Information is "material" when that information, by itself or when combined with other information, either establishes on its face the unpatentability of the invention or is inconsistent with arguments of patentability made to the PTO.

Information such as prior patents, printed publications, public uses, or a sale or offer of sale of anything that arguably embodies the invention must be disclosed to the PTO via an Information Disclosure Statement ("IDS"). Please advise us of any such information, so that we can consider a disclosure to the PTO. We will prepare an IDS with respect to the information already known to us.
